- Programming, Arduino

Languages

English ● ● ● ● ●

I am an IT professional who graduated from Yeditepe University with a degree in Information Systems and Technologies and has gained two years of experience as a full-stack developer. I continually develop my skills in various sports and programming. My career goal is to make a difference in the industry by working with a talented team in an innovative and dynamic company that closely follows new technologies. In line with this goal, I maintain an approach open to constant learning and development, keeping up with the latest trends in the technology world.

Work experience

Fullstack Developer Nov 2022 - Present
Graf Studios, Istanbul

I am currently employed at an advertising agency that is venturing into the IT sector. This collaboration occurred at the beginning of the company's journey to achieve its technology objectives. I have been involved in both front-end and back-end web development tasks, as well as working on DevOps improvements. Being part of the initial stages of the project gave me the opportunity to select the foundational technologies for the project. Throughout this process, I contributed to establishing a strong foundation in the IT field for the company by providing innovative solutions.

Education and Qualifications

Bachelor Degree Sep 2016 - Jun 2022
Yeditepe Üniversitesi, Istanbul

I graduated with a bachelor's degree in Information Systems and Technologies from Yeditepe University. During my university years, I had the opportunity to explore various programming languages, which provided me with a broad perspective on technology and software. The projects I worked on during my education played a significant role in strengthening my knowledge and developing my application skills. Additionally, the high-quality education I received from expert professors and the support from my peers enabled me to graduate as an experienced IT professional, ready to enter the industry.
